(54) **Signal transfer apparatus for a computer**

(57) A signal transfer apparatus of a computer, having a substrate (30) installed in a main system frame (100) of the computer, a driving device (31) installed on the substrate for converting a video signal into a current signal, a semiconductor laser array (35) for emitting light corresponding to the current signal from the driving device, an optical fiber bundle (40) for transferring the

light emitted from the semiconductor laser array to a display (110), a photo receiver array for converting the light transferred through the optical fiber bundle into a current signal, and a converter (51) for converting the current signal output from the photo receiver array into a video signal.
